

## ALMI AL2- MANUAL PIPE NOTCHER

The Almi range of pipe notching machines are manufactured in Holland and provide the perfect solution to notching tubes prior to welding.

The AL1, AL2, and AL3 manual notchers are an excellent cost-effective solution for 90° joints.

With the pipe notcher AL2 you can notch external pipe diameters of Ø48.3 (1 ½") and Ø60.3 (2").

### Specifications:

ALMI AL2 - Technical Specification	
Suitable for	Extr. Pipe diameters Ø48.3-(1_1/2") and Ø60.3-(2")
Advantage	Quick and easy notching
Wall thickness (steel)	3mm
Wall thickness (stainless steel)	2.5mm
Weight	15kg
Operation	Manual
Application	Round pipe

### Features:

#### EASY USE

With the pipe notcher AL2 you can notch external pipe diameters of Ø48.3 (1 ½") and Ø60.3 (2"). Unlike punch bending machines with separate auxiliary tools, the pipe notcher from ALMI is always immediately available. And the price is even lower than the relevant tool for such a machine. The machines with manual operation are easy to mount on the wall. With ALMI pipe notchers, filing or milling pipes is a thing of the past. Thanks to their favourable price and high productivity, the ALMI pipe notchers are a great investment. Thanks to the add-on lever, you can easily notch a pipe with little effort.

#### EFFECTIVE

All advantages at a glance: high productivity, low investment, simple and fast operation, suitable for multiple diameters and ideal for double corner joints.

#### SUSTAINABLE

ALMI pipe notchers are made of high-quality steels, which guarantees a long service life.
