

# G WEIKE LF-60MA- AUTOMATIC

## TUBE CUTTING FIBER LASER

Professional cutting laser for cutting tubes, and pipes of all possible metal materials with a maximum length of 6000 mm. **The LF60MS version** is equipped with an automatic clamping that is able to rotate the material with a diameter of **20 – 210 mm** for tubes and **20 – 150 mm** for square profiles. Similar to the CNC laser version for sheet metal cutting, this fiber laser works with the **highest possible accuracy and speed** and is characterized by the quality of workmanship.

- The Tube/Pipe cutting laser machine gives an opportunity for 3D cutting with a rotating chuck mechanism.
- A fully enclosed design ensures safety.
- Transmission and precision: Fiber laser cutting machine is equipped with a German Atlanta rack, Japanese Yaskawa motor, and German Neugart reducer gear unit.
- Independent Control Cabinet
- The CNC system controller ensures high productivity and simple operation.

## FEATURES:

### Full- automatic feeding & unloading mechanism

- Automatic Feeding  
Realize the intelligent material separation, feeding, and seamless docking with the fiber laser cutting machine after the whole bundles of tubes are placed in the feeding device, and ensure that only one tube is delivered to the conveying arm each time.
- Automatic Unloading  
The finished product is automatically dropped to the storage bin, double support-bearing auxiliary support overlong tubes. Professional three-chuck configuration, full-stroke clamping, one machine can cut open holes, cut arcs which greatly saves the cost of raw materials

### Fractional Automatic Support Installation

It employs an intelligent tube support design, which can solve the deformation problems in the process of long tube cutting.

### Clamp Design

It adopts a pneumatic clamp design on both sides and can modulate the centre automatically. The diagonal adjustable range is 20-300mm.

### CUT SAMPLES:

Machine model	LF-60MA
Laser power (IPG)	1000W, 2000W, 3000W, 4000W, 6000W (Optional)
Dimensions	12694*5345*2638
Tube length	6000mm
Tube diameter	20mm-300mm
Repeat positioning accuracy	±0.02mm
Specified voltage and frequency	380V 50Hz
